Home Shelter Kit

Assemble one now and keep it readily available. Keep temperature-sensitive items inside your home and mark them with their date of purchase. Replace them periodically throughout the year. Batteries kept in a cold refrigerator prolongs their charge. Devise a plan on where you will go and how you can be reached if you leave your home so that family members will know that you are safe.

Please Note: Items marked with star (*) should be kept in your Shelter Kit beforehand, in case you need to leave home quickly.
